In open-air classes every advantage should be taken of teaching arithmetic by means of measurements, i. e. large measurements in lower grades (t, 2, and 31 more minute measurements in higher grades. This work should be done, as far as practicable, by means of games and plays, competition, i-e., scoring, measuring between points out of doors, etc. The mental strain of arithmetic can be reduced greatly by using muscular sense rather than visual sense, especially in written arithmetic, e. g. blackxiard work and exercises in counting, addition, subtraction, multiplication, division, incidental to exercise, games, and plays. Mental arithmetic should not follow a lesson in history, writing, drawing, or sewing. Writintj and drainirii.-- These subjects should he taught, in the earlier grades, by means of large muscular movements rather than through the sense of sight. This should be done by large shoulder movements in forearm work...
