

Nasoalveolar Moulding in Cleft lip and Palate children

By Preethi V. C.

LAP Lambert Academic Publishing Jul 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x3 mm. This item is printed on demand - Print on Demand Neuware - Cleft lip is a congenital deformity characterized by the presence of unilateral or bilateral upper lip schisis. Cleft lip and palate can arise with considerable variation in severity and form. The purpose of this book is to highlight the effectiveness of nasoalveolar moulding appliance used to direct growth of the alveolar ridge, lips, and nose in the pre surgical treatment of cleft lip and palate. As a result of this appliance, the primary surgical repair of the nose and lip heals under minimal tension, thereby reducing scar formation and improving the esthetic result. 56 pp. Englisch.

Reviews

A fresh e-book with a brand new perspective. This is certainly for anyone who states that there had not been a really worth reading. I am just happy to explain how this is the very best publication I have gone through in my individual lifestyle and may be the best pdf for ever.
