We are happy to say there are no signs of failing health - only of vigorous manhood. Our columns were never before found so strait for the matter sent us by hosts of willing and enthusiastic contributors, neither has the number or universality of our readers lessened; for Science-Gossip is known all over the globe. This is a great deal to say, when we remember the number of popular Science periodicals which have competed for public favour since our magazine was launched twenty-two years ago. We have endeavoured, as far as lay in our power, to cater for every class of our readers - geologists, astronomers, botanists, entomologists, ornithologists, conchologists, microscopists, c., as well as that large and undefined host of readers who are content to be fond of Natural History. Where we have failed to please, we feel confident it has not been for want of good intentions. In the present volume we commenced a series of monthly papers on Astronomy and Meteorology, which we were fortunate to have written for our pages by Mr. John Browning, F.R.A.S., the well-known Astronomer and Optician. Science is always increasing the number of its Gateways. Openings into the Unknown are familiarly used now which were never thought of a quarter of a century ago.
