

## Behavior and Mood Disorders in Focal Brain Lesions

By Julien Bogousslavsky, Jeffrey L. Cummings

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2013.  
 Paperback. Book Condition: New. 246 x 173 mm. Language: English . Brand New Book. Unique in approach and authority and illustrated with informative case histories, Behavior and Mood Disorders in Focal Brain Lesions, first published in 2000, makes a major contribution to understanding the relationship between focal brain disorders and emotional and behavioural symptoms, summarising the current state of research and providing the basis for improved patient care. This is the first clinical reference work to address specifically the relationship of focal brain dysfunction to behavioral and emotional disorders, giving the most comprehensive account available of these manifestations of brain lesions including stroke, trauma, epilepsy, multiple sclerosis, and even neurosurgery. A worldwide team of neuroscientists and clinicians examines the links between regional brain dysfunction and disorders of mood, thought and affect processing, and behaviour. Chapters are devoted to methodological issues, to lesions of specific sites, such as the frontal lobes, basal ganglia and thalamus, and to symptoms such as mood disorder, violent behaviour and anosognosia.
