

## From Human Dawn to Politics: Illustrated Science

Filesize: 3.95 MB

### ***Reviews***

*Complete guideline for ebook lovers. Better then never, though i am quite late in start reading this one. Its been printed in an remarkably simple way in fact it is only right after i finished reading this book through which in fact transformed me, alter the way in my opinion.*

## FROM HUMAN DAWN TO POLITICS: ILLUSTRATED SCIENCE

Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. Illustrated. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Ice Ages have evidently played an important role in the development of humanity, since the last 2 million years of the history of humanity occurred during the modern Ice Age Epoch, the Pleistocene Epoch. For 85 of this time glaciation conditions occurred. What we refer to as history, spans only the brief period of the current interglacial. The period began with building of the Giza Pyramids 12,800 years ago, as some researchers say. The extremely accurate alignment of the pyramids confirms that potential. At the break-out from the last Ice Age, major features of the Primer Fields that focus plasma onto the Sun, would likely have been visible in the sky at this time and be used for celestial orientation. Likewise, the Stonehenge monument in England reflects features that are visible in high-energy plasma discharge experiments; which may have been visible in the sky in early times in the post glacial period. The great monuments suggest that the ancient builders were highly intelligent, which may reflect conditions in Ice Age environments. During the modern interglacial, the great cultural developments occurred during the cold little ice age periods, which are periods of high rates of solar cosmic-ray flux. The insane periods of modern politics where periods of opposite conditions. During the inactive state in solar activity, when the Sun reverts to a type of cosmic default level with 70 less radiated energy, higher rates of solar cosmic-ray flux are being experienced, with a reduced shielding effect by the thinner plasma surrounding the Sun. We are presently on track back to those conditions. At the present rate of diminishment, the solar activity phase-shift threshold to the...
